Re: Prescott High School
Resurfacing of Concrete Bleachers at Bill Shepard Stadium

Dear Tom,

Our firm, the Prescott Unified School District staff, and Prescott High School staff involved with the Concrete Bleacher Resurfacing project at Bill Shepard Stadium would like to convey our commendations to you and the construction crew you had onsite for the project. We were very pleased with the timely progression of the work, the quality of the work, and the attentiveness of Andy Mendoza and Todd Diss (project foremen) throughout the course of the project.

With the number and scope of projects ongoing simultaneously on the PHS campus this summer, CRSI was the least of our worries. The finished product exceeded our expectations and the resurfaced stadium bleachers will benefit the entire Prescott community for many years to come. Please relay this information to the project crew as it is truly well deserved. Thank you very much to you and the project crew for all of your efforts towards the successful completion of this project.

Sincerely,

James R. Shattuck Jr.
Project Architect
